God-Centered Thinking Urged at Church Session

A return to "God-centered thinking" is the world's most urgent need, said the new president of the Christian Science Church in Boston Monday.

Speaking before the Church's high annual meeting through Mrs. Helen Wood Bauman warned that the scientific advances taking place in the world today are in danger of being misunderstood.

"Intense interest in technological skills and human inventions is again tending to divert thought from God," and neglecting "to give Him credit for a great release of mental energy," she declared.

INSTEAD OF "indifference to God," men should be finding Him as "the center and circumference of their being, the

source and fulfillment of their honest aspirations."

Mrs. Bauman called upon church members "to help the world in its struggle against the atheistic materialism that defies mortals."

The "self-centered, human-centered tendencies" must give way to a "diviner energy," she said — to an energy that "Christianity holds within itself," always drawing men back to the simple teachings that make Deity "the focal point of love and interest."

SUCH WORSHIP "acknowledges God as the only course of intelligence and skill, and inspires men to love Him with all the heart and soul and mind and strength," she said.

"The God-centered thought is constantly refreshed at the fount of intelligence and love.

"When God is fully understood as underlying all constructive developments, when he is seen as sustaining all progress," then will all men "delight in turning to Him," declared the new church president.

"All that is worth possessing, worth pursuing, worth expressing must be linked with the one creator, the one center and circumference of being, with the God who demands our love."

THE ADDRESS was presented in The First Church of Christ, Scientist — known as The Mother Church — before several thousand members from all over the world.

They heard annual reports from many church departments indicating stronger re-

ligious activity and interest among young people.

Larger numbers of high school and college students are attending church lectures, applying for membership, subscribing to the Christian Science Monitor, and sending in their own articles to the religious periodicals, it was related. Among the outstanding spiritual healings reported at the meeting were some by Sunday School students.

ESTABLISHMENT of a Christian Science Society in Bangkok, Thailand, was cited as one of the latest additions to the church's more than 3,200 congregations.

In their annual message to the meeting, The Christian Science Board of Directors described the major distresses in the world as "symptoms of a drying up of outgoing love." They called for a "compassionate, outreaching love for mankind" as the basic remedy.

The retiring president, Ralph E. Wagers of Chicago, also emphasized the importance of re-

LCOM Advisors To Meet Today

The Advisory Board of LCOM Company of Mary Hospital will hold its regular monthly meeting today in the Library Conference Room at 8 p.m.

Robert Eisleben, assistant administrator of the hospital, stated the agenda for the meeting includes, a report by the various committees, long range planning for hospital growth and a review of the plans for the Sisters residence.

A virus that causes leukemia — a form of cancer — in mice has been photographed for the first time by government scientists. Like many well-known viruses, it looks like a tadpole with a hexagonal head.

sponding to the "impulsion of divine Love." He said it would help to bring the "spiritual climate" in which all the great problems of the world can be solved.
